

SafeZone

SafeZone, a unified safety, security and emergency management solution for healthcare organisations worldwide

Each year, more than

75,000

staff experience physical violence and aggression in the NHS¹

STAFF SAFETY, EVERYWHERE

Unlike a typical staff duress system, SafeZone® helps you keep your people safe with one unified system. By providing you with **Safety Everywhere™**, you and your staff are covered wherever you have duty of care: on campus and in buildings, parking areas, in community

clinics — even coverage for home healthcare workers. Addressing these safety and security gaps is key to your success, so your staff are assured your organisation values their safety and feels confident on the job; which translates to better retention and patient outcomes.

SafeZone provides you with:

- └ Real-time Coordination and Response, for faster and more effective response
- └ A solution that is quick to deploy, scalable and easy to use
- └ Operational Insights™ to optimise future response

Workplace Violence Mitigation

Staff can easily raise alerts with their location and profile so first responders can acknowledge receipt and respond to positively influence the outcome of the incident.

Remote Worker Protection

Staff such as home health workers, floating staff, transport, couriers etc. can check-in, share their location and discreetly send an emergency alert to receive assistance regardless of their location.

Lone Worker Safety

Safety for lone workers via check-in using mobile phones or wearable Bluetooth alert devices that initiate acknowledgement and emergency response.

Location Based Mass Notifications

Send communications to clinicians and employees based on location with ease in seconds.

Fastest Possible Response

Availability and location of security officers is known 24/7 so they can be dispatched quickly and efficiently and reduce response time to enhance outcomes.

Operational Insights

Provides insights to optimise performance with use of patrol area heat-maps and auto-recorded incidents to train and enhance team performance.

Patient Experience and Emergency Preparedness

Your organisation's commitment to staff safety will translate into greater staff satisfaction, which leads to a greater overall patient experience. When your staff feels safe, they are able to do their job more effectively and provide the best patient outcomes.
