

Global Consulting Offerings

About

CriticalArc's consulting services deliver key benefits that prioritize safety, security, and operational efficiency. With a comprehensive approach, our offerings address risk management, compliance with regulations like the Clery Act, and effective leadership development.

By optimizing technological infrastructure and integrating systems, CriticalArc aids organizations in streamlining operations and eliminating inefficiencies. Emergency preparedness training and tactical support offerings enhance institution readiness for critical incidents, while tailored communication strategies improve operational awareness and expedite incident response times.

Guided by expert insights, our customized solutions empower organizations to foster safer environments, meet compliance standards, and drive long-term organizational effectiveness.

Who We Are

Our consultants' backgrounds include military service, law enforcement, emergency management, and security across public entities and private corporations. Led by Jason Goodrich, Certified Protection Professional, and former police chief with over 20 years in US campus and medical center law enforcement, our team draws from the considerable talent of public safety executives around the globe to leverage their knowledge and experience to help you solve your organization's unique challenges.

Whether you're a higher education client, private corporation, or healthcare client, our network can guide you through a variety of needs including regulatory challenges, technology implementations, organization development strategies, emergency management, and risk assessment.
