

# Your Complete Staff Protection Solution

From the hospital to the patient's home, **SafeZone protects and empowers your people.**

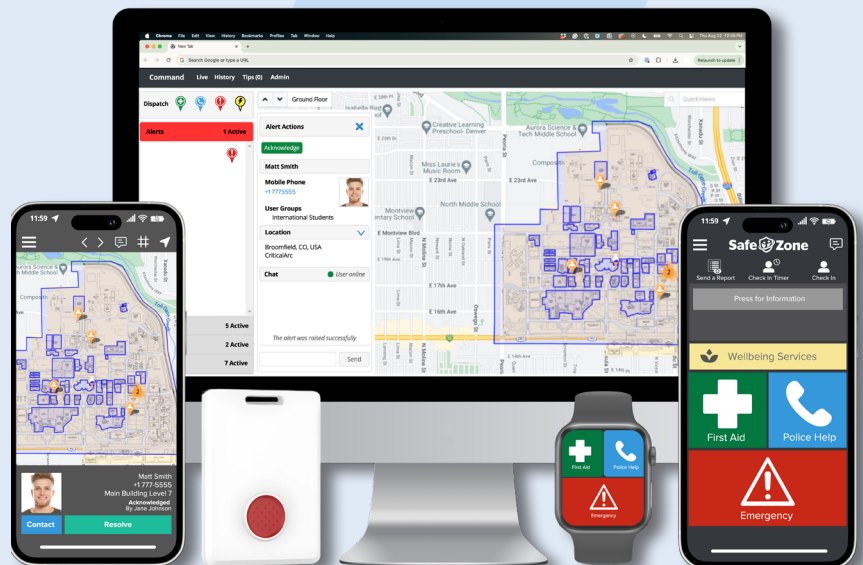

CriticalArc's award-winning SafeZone solution offers transformational capabilities to empower healthcare institutions, uniquely delivering **Safety Everywhere™**. Regardless of duty of care requirements or disparate safety systems, CriticalArc's SafeZone provides healthcare organizations the ability to enhance safety across hospitals, parking garages, medical office buildings (MOBs), and even in community and patient home settings—all through one unified solution.

As a market leader for over a decade, CriticalArc has extensive experience in delivering location-based safety, security, wellbeing, and emergency management services with unparalleled precision. SafeZone's indoor positioning provides **sub-three-meter accuracy**; any room, any floor, and any building.

## The Leading All-In-One Solution

Unlike other solutions on the market, SafeZone unifies multiple security and safety capabilities under one efficient 24/7 support and response system, including:

- Workplace Violence Mitigation
- Lone/Remote Worker Safety
- Location-Based Mass Comms.
- Fastest Possible Response
- Operational Insights
- Wellbeing Support
- Real-Time Visualization & Coordination of First and Secondary Responders

# What Makes SafeZone Unique?

Unlike traditional RTLS systems that require significant capital investments to deploy proprietary hardware, CriticalArc's SafeZone leverages existing customer environments to deliver a scalable, secure, and robust safety solution. By utilizing a customer's **Bluetooth-enabled Wi-Fi network** (supporting Cisco, Juniper, and HPe Aruba), SafeZone minimizes deployment costs and complexity. For organizations yet to upgrade their network infrastructure, CriticalArc's SafeZone also offers a **standalone or hybrid Bluetooth network solution** powered by its technology partner, Polestar.

## New Wearable Device Puts Staff Safety in Their Hands

SafeZone's wearable duress device, **SafeZone Companion**, was designed to redefine personal safety. Engineered with innovative state-of-the-art technology and intuitive design, SafeZone Companion empowers you to navigate the workplace with confidence, ease, and assurance, knowing help is just a touch away. With features like:

- Instant Alerts
- Discreet Design
- 24/7 Support
- Long-Lasting Battery
- Non-Proprietary Network
- One-to-Many Escalations
